

Jui-Ling, Lin (Lina)

+886 905 153859 | 2018gsb.linrl@gmail.com

I have cross-disciplinary experience in product development and UI/UX design, with strong proficiency in user research, market analysis, and optimizing user experiences. In the healthcare industry, I have successfully employed user research methodologies to define product feature requirements and translate user needs into actionable product strategies. Currently, I focus on human-computer interaction and generative AI research at NTUT, leveraging these technologies to address the limitations of traditional museum guide systems and create meaningful design outcomes.

WORK EXPERIENCE

Advantech Co., Ltd.

UI/UX Intern, Early Design Campaign

Taoyuan, Taiwan

Jun 2025 - Aug 2025

- Developed VisionDetect AI Platform
 - Assisted in conducting three interviews (system integrators and two categories of EHS personnel) to identify contextual pain points and needs, supporting the PM in defining project scope and user requirements.
 - Designed an intuitive VLM (Visual Language Model) prompt input method to improve issues of model variability and unstable output quality caused by natural language input.

EZTRAVEL Co., Ltd.

UI/UX Intern, Mobile Technology Department

Taipei, Taiwan

Jun 2024 - Dec 2024

- Developed ezTravel app
 - Analyzed competing e-commerce products to assess the information architecture, operational models, and workflows of their membership points systems; identified proven, high-impact design patterns and optimized the UI, contributing to a successful launch.
 - Used Python to clean and filter customer service data, reducing data volume by 74% and improving processing speed by 3.8x; designed an automated response workflow to enhance operational efficiency and accuracy.

H2U Corporation

Software Development Intern, R&D Department

Taipei, Taiwan

Jul 2022 - Aug 2022

- Developed SportsNote app
 - Led 13 semi-structured interviews and usability tests to evaluate event listings and running functionalities, prioritizing interface enhancements based on task completion times and error rates.
 - Collected 199 survey responses to analyze runners' exercise behaviors and habits, redefining app functionalities and competitive differentiation by narrowing 10 feature requirements down to 4 core functions.

EDUCATION

National Taipei University of Technology (NTUT)

M.Des in Innovation and Design

Taipei, Taiwan

Sep 2022 - July 2026

- **GPA:** 4.0 / 4.3
- Position: Executive Secretary, Taiwan Kansei Society.
- Built and deployed a RAG-based conversational AI museum guide system, Accepted for oral presentation at IEEE ICASI 2026.
- Relevant Coursework: Prompt Engineering in Design, Practical Principles of Generative AI for Text and Image Generation, Practical Computer Vision and Deep Learning.

EXPERIENCE

9th Taiwan Kansei Society | Executive Secretary

Taipei, Taiwan
Mar 2025 - Present

- Planned and executed the IG and FB 'Taiwan Kansei Daily Challenge' marketing campaign, attracting 12 participants within three weeks and growing IG followers from 0 to 39, effectively increasing the society's visibility.
- Redesigned and rebuilt the society's official website using a no-code platform, enhancing overall visual design and interaction flow.
- Assisted in designing and promoting seminar posters for partner universities across the society's social media platforms.

9th Taiwan Human-Computer Interaction Conference | Posters and Demos

Taipei, Taiwan
Aug 2023

"ALARM: A VR Message Notification System Based on Safety"

- Responsible for literature review, survey analysis, and VR UI design.
- Prepared the presentation content and served as the presenter.
- Out of 7 teams, 2 teams were selected, with the final project receiving the opportunity to present at the 9th Taiwan Human-Computer Interaction Conference.

Awards

2025 International Design Award (IDA) | Health & Life Science-Products for Social Impact / Honorable Mention

Bangkok, Thailand
Dec 2025

"TouchTune" Wearable devices for the hearing-impaired with a mobile app

- Responsible for literature review, product sketching, workflow and interface design, and mockups.

2025 un Design Award | Product Design Category Conceptual Product / Gold

USA
Jun 2025

"TouchTune" Wearable devices for the hearing-impaired with a mobile app

- Responsible for literature review, product sketching, workflow and interface design, and mockups.

2023 National Intercollegiate Smart Innovation and Cross-disciplinary Integration Competition | Best Attention Award

Taipei, Taiwan
Jul 2023

"Wheelchair Basketball: VR Wheel Chair Basketball Drills"

- Responsible for desktop literature research, market survey, interviewing industry experts, and designing VR UI.
- Used Unity game engine for character control and gameplay implementation.
- The competition included 4 main categories with 372 teams from 71 universities. 80 teams advanced to the finals, with the final project receiving the Best Attention Award.

TISDC Taiwan International Student Design Competition | World Design Organization Special Award

Taipei, Taiwan
Nov 2022

"SpineUp" Scoliosis Lumbar and Thoracic Brace with Physical Therapy App

- Responsible for literature review, interviewing industry experts, interface design, and video editing.
- The competition is divided into three main categories, with participants from 66 countries, totaling 16,749 entries. 587 entries made it to the final selection, and ultimately, 77 outstanding works received awards. The final project was awarded the World Design Organization Special Award.
